Good morning everyone,

The weather is warming up and the traffic on W. Church Street (and other streets as well, I am sure) is picking up speed.

I truly look forward to a time when Hardwick is recognized as a Pedestrian Friendly community. It is far from that now. A good way (in my view) to head in that direction is with Speed Humps.

I have attached a few photos of a speed hump. This is a very gradual incline, absolutely easily plow-able, impossible to injure a vehicle, yet slows traffic down. I have watched it happen for real over the last several days as there is a speed hump near where I am staying.

The Speed Hump as I mentioned is a very gradual incline shaped like a diamond slightly higher in the center. The hump is signed in each direction just prior to it.

Thank you for your consideration.

Best,  
-Michael
