

What We Are Looking for From the Community Survey

- Who we hear from and who we are not, to identify gaps in representation and outreach.
- How people use Hardwick day to day, including travel patterns and downtown use.
- Which community priorities have shifted since the last plan, particularly after recent flooding and pandemic disruptions.
- What rises to the top when people are asked to choose among competing priorities.
- General direction on housing needs and preferences, recognizing this is not a technical analysis.
- How residents think about preparedness, safety, and resilience going forward.
- Whether assumptions in the current Municipal Plan still reflect lived experience.
- How people prefer to receive information from the Town.

What the Survey Is Not Intended to Do

- Select specific projects or designs
- Replace technical studies or regulatory analysis
- Resolve every issue in the Municipal Plan update
